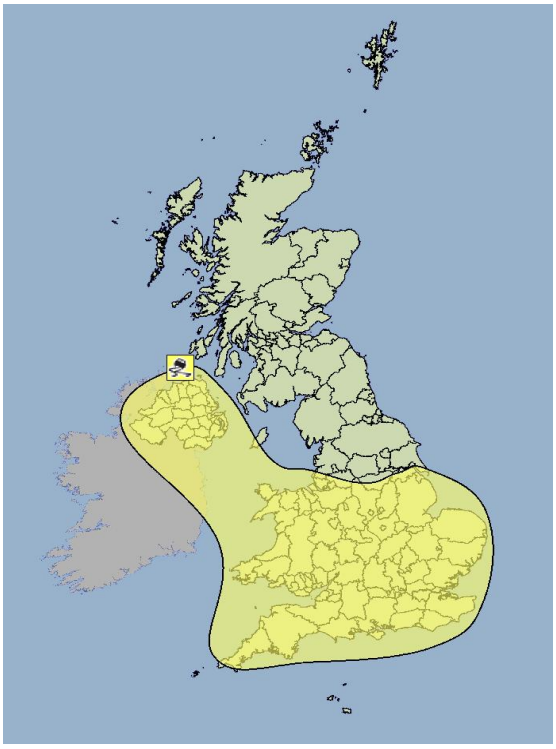
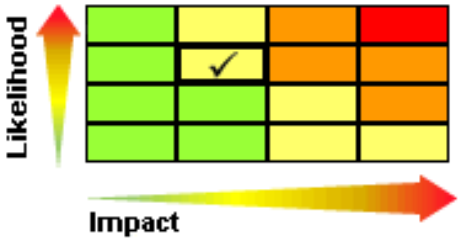
National Severe Weather Warning Service





Chief Forecasters Assessment
A combination of low temperatures and surfaces likely to be wet, from earlier rain and snow or a partial thaw of lying snow, will lead to icy stretches forming on untreated surfaces. A further cm or two of snow could occur in places away from the south coast. This warning has been updated to include the possibility of some further sleet or snow in places.

The Met Office have issued a **Yellow Warning** of **Ice**

Valid from **00:05 on Sat, 03rd Mar 2018** until **09:00 on Sat, 03rd Mar 2018**

Following earlier spells of rain, and snow, icy patches are likely on untreated surfaces during Saturday morning. As a result, diving conditions may become difficult and there is an increased chance of injuries from slips and falls on icy surfaces. In addition, further outbreaks of sleet or snow or snow showers could occur in places away from south coasts.
